## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-17, 20-23, 32 and 33, drawn to natural language processing (parsing rules, and generating alternate rule options), classified in class 704, subclass 9.
  - II. Claims 24-31, drawn to natural language processing, (displaying/navigating between one of a possible plurality of parses), classified in class 704, subclass 9.
2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as comparing generated parses irrespective of the ability to manipulate or view the grammar rules and/or alternate rule options used in generating one of the parses. The limitations in independent claims 24 and 29 are not found in any of the previous claims and therefore provide the Examiner with the burden of a further search towards divergent subject matter. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
